Data from stone 8 with citation

My data states the citations and numbers of child poverty throughout the U.S. in the years of 2019-2022 including LowerCIB, UpperCIB, year, estimate, and flag.

List of columns names

MsCode- code for the law, DemCode-provides emergency management services,
EstCode-number and populations, Year-year of poverty, Estimate- children in poverty
each year, SE-special requirement, LowerCIB- values compared to its non-
consortium counterpart., UpperCIB- variation among states, and Flag-no data
available

The columns recorded the child regulation data files of child poverty throughout the years
in the United States

I picked this data because I want to work in a field related to children who are in need and i
find it interesting to learn about how child poverty increases or decreases over the
years
